

Registers of Interests & Gifts and Hospitality

Under NHS Wolverhampton CCG's policy for Managing and Declaring Interests, all individuals covered by the policy (including Governing Body Members, Staff and contractors) are required to declare any interests held by themselves (or a close relative or associate) which could present a potential conflict between their private interests and their CCG duties. Relevant interest are defined in the policy as follows:-

- **Financial Interests** – where an individual or somebody with whom they have a close association may financially benefit from the consequences of group decision (for example, a decision to commission a provider of services);
- **Non-Financial Professional Interests** – where an individual or somebody with whom they have a close association may obtain a non-financial professional benefit from the consequences of a group decision, such as increasing their professional reputation or status or promoting their professional career;
- **Non-Financial Personal Interests** – where an individual or somebody with whom they have a close association may benefit personally in ways which are not directly linked to their professional career and do not give rise to a direct financial benefit (for example, a reconfiguration of hospital services which might result in the closure of a busy clinic next door to an individual's house);

Individuals covered by the policy are also required to declare offers of gifts and hospitality above the value of £25, in line with Section 8 of the policy.

The Tables below gives details of declarations of interest and of gifts and hospitality received that have been made by individuals covered by the policy and was last updated in **October 2019**
